CD Tote

A tote in the general shape of a portable compact disc player designed to encase such a compact disc player, made of various sturdy materials such as leather, cow hide or other similar materials. The tote is designed with various frontal shapes to accommodate any shape or design of a compact disc player. It is incorporated with a waterproof plastic face and ribbets on the side depending on the shape and model of the compact disc player to allow the head - phones to be attached to the compact disc player. The compact disc player tote has a zipper around the base of the tote to insert the compact disc player allowing for the playing of the compact disc placed within it allowing for minimal listening interference. The tote is also designed with a clip attachment that is connected to the rear of the tote so that the compact disc may be worn snugly on a belt, waist of pants or skirt. Making the transporting of the compact disc player more convenient for the user.
